Beginner Sewing & Fabric Mending Guide

Fix Loose Buttons, Fallen Hems & Split Seams in 10 Minutes

1. The Bulletproof Way to Sew On a 4-Hole Button

• Thread your needle with 18 inches of thread doubled over and tie a small knot at the end.

• Place a toothpick or matchstick across the top of the button while stitching up and down in an 'X' or parallel pattern 6 times.

• Remove the toothpick, wrap your thread 4 times tightly around the threads *under* the button (creating a strong 'shank'), and knot securely underneath!

2. The Invisible Blind Hem Stitch for Pants & Skirts

• Fold and press the hem with a warm iron, pin in place, and catch just 1 tiny thread of the outer fabric every 3/8 inch so your stitches disappear on the outside.
